

vänEE Introduces  
**The New 60H**  
The space-saving ventilation system.

Combining innovative technology and engineering expertise, vänEE has successfully redefined ventilation for small-space applications – exclusively for HVAC professionals.

Engineered and designed for optimal performance in compact spaces, this air exchanger is the ideal choice for condos, apartments, pre-fab houses and tract homes. What's more, it's the only unit of its size that can perform two distinct operations: *Heat Recovery and Energy Recovery*, simply by changing the core of the unit. And its vertical or horizontal ports combined with other exciting features make installation easier than anything else on the market. **The New 60H from vänEE**, a compact solution that installers, specifiers and builders everywhere have been waiting for.

# The New 60H

As versatile as it is compact.

- 20% smaller than comparable units
- State-of-the-art ventilation technology
- Upgradable from an HRV to an ERV with a simple swap of its core

- Versatile horizontal or vertical port configuration
- Easy to install
- Easy to maintain
- Meets standards and building codes

**Dimensions:**

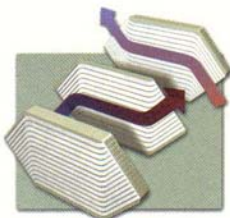

H 12.2 in. (30.1 cm)  
W 22.6 in. (57.4 cm)  
D 19.8 in. (50.5 cm)

**Rate of air flow:**

45-100 CFM

**Voltage:**

120 V

**Unique ERV Core**

Patented counter cross-flow technology provides the most effective efficiency/volume ratio of all the units of its category.

**Intelligent Flow Damper**

External port contains motorized damper with integrated logic to monitor damper conditions at all times.

**Flexible Port Configuration**

Versatile design allows for vertical or horizontal configuration on the same frame, facilitating installation and maintenance. (Factory-configured.)

**Bottom Door Opening**

Unique bottom door opening design allows left or right side installation for easy access from any angle.

## Small-space installations made easy.

Unique slim design lets you hide unit inside standard 12" bulkheads. Easily install and access unit through ceiling grille.

Compact footprint allows for an easy fit in mechanical rooms, closets or other applications where overall space is restricted.
